

Linear recirculating ball bearing units

KUVS17-B (Series KUVS)

linear recirculating ball bearing units for guideway with raceways on both sides

The datasheet is only an overview of dimensions and basic load ratings of the selected product. Please always observe all the guidelines in these overview pages. Further information is given on many products under the menu item "Description". You can also order comprehensive information via the Catalogue ordering system (https://www.schaeffler.de/content.schaeffler.de/en/news_media/index.jsp) or by telephone on +49 (91 32) 82 - 28 97.

We recommend that the tightening torques of the screw connection to the adjacent construction should be determined at the customer under the specific application conditions and operating conditions, observing the data in VDI Guideline 2230 Part 1 (2015) and the data in the description.</p>

		In relation to two ball bearing units for TKVD32, TKVD42 and TKVD69, to one ball bearing unit for TKVD14.

The usable load carrying capacity is influenced by the connections between the guidance elements and the adjacent construction.

The full load rating can only be supported if the full thread length is used and the adjacent construction is correspondingly dimensioned.
