**Customised identification: EL**

The endless variations of MultiMark markers make them an economical alternative to conventional tag rails or special labels. For any given width, the height can be precisely configured by the software to match the respective markers perfectly. A blade is used to cut the labels individually to the specified size. Perfect for producing large labels for function blocks or complete terminal blocks.

**Your benefits with MultiMark**

- “Different materials for various requirements”
- Can be used with equipment from many manufacturers
- Device markers with a familiar design
