31~38	10		5.0		
39, 40	12	0 -0.043	5.0		

Specify an alteration position to be 2mm or more away from the stepped part. For details, see P.787.
Do not specify multiple alterations in such a way that they overlap with each other in the rotating direction on the same shaft. For details, see P.787.
When flat machining, wrench flats, square chamfering and keyway alterations are combined with each other, their orientations will be random. For details, see P.787.
When adding multiple alterations, there must be 2mm or more clearance between each feature. For details, see P.787.

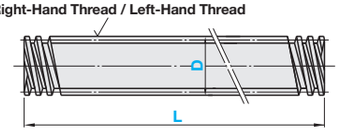
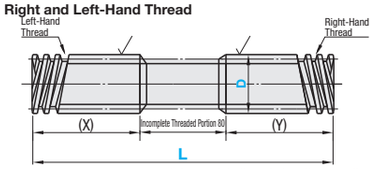
6.3 (3.2)
X=Y for Right and Left-Hand Thread Type.

Right-Hand Thread / Left-Hand Thread



Right and Left-Hand Thread



Incomplete Threaded Portion of Right and Left-Hand Thread Type

The Center between the right-hand thread and the left-hand thread is an incomplete thread portion (approx. 80mm) resulting from rolling machining. This portion, including the shaft part enclosed with ○, is not useable.

Incomplete threaded portion near the center (80mm) is not useable.

■Right-Hand Thread / Left-Hand Thread / Right and Left-Hand Thread

*D dimension 22, 36, 40 and 50 are not applicable to Stainless Steel. D dimension 25, 28 and 32 are applicable to Right-Hand Thread only.
The both ends of MTSRL and MTSLL have not been processed. Additional machining (chamfering, processing of the shaft ends, etc.) is required for use.
D8 is available for MTSR and MTSBR only.

Ordering Example
