

Antivibration Rubber Mounts Stainless Steel Studs (Conductive Rubber, Chloroprene Rubber)

Both Ends Threaded Studs / Threaded Stud, Plate Mount

Antivibration Rubber Mounts Stainless Steel Studs (Conductive Rubber, Chloroprene Rubber)

Tapped and Threaded Studs / Tapped Stud, Plate Mount

The problem of antivibration rubber, susceptibility to insulation has been solved by the high electroconductive rubber with volume resistivity value of $10^9 \Omega \cdot \text{cm}$.
Slots on ends and long mounting holes for ease of attachment.

The problem of antivibration rubber, susceptibility to insulation has been solved by the high electroconductive rubber with volume resistivity value of $10^9 \Omega \cdot \text{cm}$.
Slots on ends and long mounting holes for ease of attachment.

Both Ends Threaded Studs

Type	Material		Hardness	Accessory
	Main Body	Metal Fitting		
DBGOMA	Conductive Nitrile Rubber	EN 1.4301 Equiv.	Shore A60	Nut, Spring Washer 2 pcs. each
EBGOMA	Chloroprene Rubber	EN 1.4301 Equiv.	Shore A60	Nut, Spring Washer 1 pc. each

Threaded Stud, Plate Mount

Type	Material		Hardness	Accessory
	Main Body	Metal Fitting		
DBGOMP	Conductive Nitrile Rubber	EN 1.4301 Equiv.	Shore A60	Nut, Spring Washer 1 pc. each
EBGOMP	Chloroprene Rubber	EN 1.4301 Equiv.	Shore A60	Nut, Spring Washer 1 pc. each

*Slot is provided to prevent rotation when tightening. Hold it with a flathead screwdriver, etc.

Features

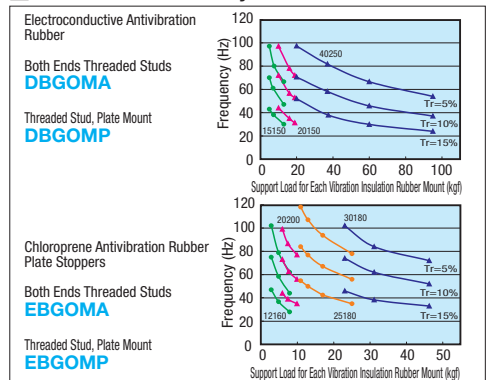

- [DBGOMA, DBGOMP, DBGONA, DBGONP]
- The problem of antivibration rubber, susceptibility to insulation has been solved by the high electroconductive rubber with volume resistivity value of $10^9 \Omega \cdot \text{cm}$.
- [EBGOMA, EBGOMP, EBGONA, EBGONP]
- High quality product made of chloroprene rubber excellent in durability
- [Common]
- Mounting studs are made of EN 1.4301 Equiv. The tips are slotted and the mounting holes on flanges are also slotted for ease of mounting.

Electroconductive Rubber Characteristics

Item	Unit	Value
Specific Gravity	-	1.31
Hardness	Shore A	60
Elongation	%	545
Tensile Strength	MPa	11.8
Specific Volume Resistivity	$\Omega \cdot \text{cm}$	8×10^3

Measuring Method: JIS K 6301
The above values are not guaranteed values but an example of measured values.

Vibration Transmissibility Data

Values in the graph are nominal for each type. The above values are not guaranteed values but a calculated ones.
